QUANTUM CLIMB

# HEALTHCARE DIGITAL GROWTH

A connected digital ecosystem for doctors, clinics, healthcare products and international patient engagement.

STRATEGY • BRANDING • TECHNOLOGY • GROWTH

**BUILD ONCE. ACCESS ANYWHERE.**

Prepared for healthcare professionals

01 | THE OPPORTUNITY

# Your expertise deserves a bigger digital presence

Quantum Climb helps healthcare professionals turn medical expertise, services, products and education into clear, credible and accessible digital experiences. We bring strategy, creative production, web development, content systems and marketing together under one partner.

From a doctor's professional identity to a clinic's patient journey, a healthcare product's online store or an international patient acquisition platform, QC can design and build the digital foundations that support sustainable growth.

### BUILD YOUR PRESENCE

Professional websites, doctor profiles, speciality pages and search visibility.

### GROW YOUR AUDIENCE

Content strategy, social campaigns, AI-assisted video and multilingual reach.

### CONNECT YOUR JOURNEY

Appointment enquiries, CRM integration, automation and patient information portals.

### SCALE YOUR OFFERING

E-commerce, online learning, subscriptions and distributor platforms.

## ONE PARTNER. CONNECTED DIGITAL CAPABILITIES.

We can support individual projects or combine services into an integrated programme, with scope tailored to the organisation, audience, markets and regulatory requirements.

02 | DOCTOR & SPECIALIST BRANDING

# Build a trusted professional identity

Help patients, peers and professional audiences understand who you are, what you specialise in and how to engage with your practice.

## WHAT QC CAN OFFER

- **Personal doctor branding:** positioning, professional profile, visual direction and digital identity.
- **Professional website:** biography, qualifications, speciality areas, clinic details, FAQs and contact pathways.
- **International SEO:** search-friendly structure and content designed to improve discoverability in selected markets.
- **YouTube medical education channel:** channel setup, content planning, episode formats and video publishing support.
- **Social media content marketing:** Instagram, Facebook and LinkedIn content calendars, creative assets and campaign support.
- **AI-assisted video production:** doctor introductions, educational explainers, short-form clips and campaign videos.
- **Multilingual video dubbing and lip-sync:** adapt approved video content for selected language audiences.
- **Appointment and consultation enquiries:** enquiry forms, booking pathways and contact integrations, subject to local rules.
- **Knowledge and article CMS:** publish professional articles, updates, educational resources and approved insights.

### POSSIBLE OUTCOME

A consistent professional presence that makes it easier for people to discover a doctor, understand their area of practice and take the next appropriate step. Digital visibility does not guarantee patient numbers or clinical outcomes.

03 | CLINIC & SPECIALITY CENTRE GROWTH

# Create a better digital front door for your clinic

Give prospective patients a clear, accessible way to explore services, learn about the care pathway and contact the clinic.

QC can develop a connected clinic website and content management system (CMS) with:

- Clinic website design and development, responsive across desktop and mobile.
- Doctor and specialist profiles, service pages and facility information.
- Treatment and speciality information portals with review and approval workflows.
- Appointment request forms and booking integrations where available.
- Patient enquiry routing, contact management and CRM integration.
- WhatsApp enquiry automation and approved follow-up workflows.
- Search engine optimisation and location-specific landing pages.
- Social media content, campaign creative and paid media support.
- Analytics dashboards to monitor traffic, enquiries and campaign performance.

## EXAMPLE DIGITAL JOURNEY

| DISCOVER | EXPLORE | ENQUIRE | FOLLOW UP |
|---|---|---|---|
| Search, social media or referral | Clinic, doctor and service pages | Form, phone or messaging | Clinic team or CRM workflow |

The clinic remains responsible for clinical decisions, patient care and the accuracy of medical information. QC supports the digital experience and marketing infrastructure.

04 | HEALTHCARE PRODUCTS & COMMERCE

# Take healthcare products to digital markets

For doctor-founded brands, healthcare manufacturers and approved product businesses seeking a professional online presence and a stronger route to market.

## QC SERVICES

- **Product branding and website:** brand positioning, product storytelling, web design and product information architecture.
- **E-commerce CMS:** product catalogues, shopping flows, inventory or fulfilment integrations and content management.
- **Product videos and advertisements:** product explainers, campaign videos, short-form creative and AI-assisted production.
- **SEO and international search visibility:** technical foundations and market-specific content planning.
- **Social media campaigns:** channel strategy, creative development, publishing and campaign management.
- **Distributor and reseller portals:** product libraries, enquiry forms, partner resources and account access.
- **Lead generation and CRM integration:** capture, route and track enquiries from customers, clinics or distributors.

## POTENTIAL DIGITAL CHANNELS

Direct-to-consumer e-commerce • Professional / B2B product enquiries • Distributor and reseller networks • Product education and support content • Country-specific product pages

**IMPORTANT**

Product eligibility, claims, labelling, advertising, import/export permissions and online sales rules vary by product and country. The client must provide substantiation and obtain the required regulatory and legal approvals before publication or sale.

05 | MEDICAL EDUCATION & KNOWLEDGE PLATFORMS

# Turn expertise into structured digital learning

Build a dedicated platform for professional education, patient education or approved training programmes, with the tools to publish, manage and monetise content where permitted.

## WHAT QC CAN BUILD

- **Dedicated Learning Management System (LMS):** course catalogue, learner accounts, lessons, modules and progress tracking.
- **Subscription CMS:** gated articles, member-only resources, recurring access plans and content libraries.
- **Payment gateway integration:** online payment options supported by the selected provider and target market.
- **Automated marketing funnel:** landing pages, registrations, email or messaging sequences and conversion tracking.
- Webinar and event registration pages, replay libraries and learning-resource downloads.
- Instructor or contributor profiles, course administration and reporting dashboards.
- Video hosting or approved third-party platform integration, subject to the chosen architecture.

## POSSIBLE USE CASES

- Specialist-led educational courses and workshops.
- Professional development and training for healthcare teams.
- Patient education programmes and condition-awareness resources.
- Paid webinars, memberships and subscription-based knowledge libraries.

### ACCREDITATION & CLINICAL CONTENT

Any certification, continuing education credit or professional qualification must be issued only through an appropriately authorised body. Medical education content should be reviewed and approved by qualified subject-matter professionals.

06 | INTERNATIONAL PATIENT ENGAGEMENT

# Connect with audiences beyond your home market

Support clinics and healthcare providers that wish to communicate with international audiences and organise enquiries across selected countries.

## QC CAN PROVIDE

- **International patient acquisition websites:** clear, multilingual digital destinations for overseas audiences.
- **Country-specific landing pages:** tailored information architecture and messaging for selected markets.
- **Multilingual marketing campaigns:** localised content, creative and campaign setup.
- **WhatsApp enquiry automation:** initial enquiry capture, routing and approved responses.
- **Appointment coordination:** enquiry-to-appointment workflows and integration with clinic processes.
- **Treatment information portals:** structured service information, FAQs, doctor profiles and practical guidance.
- **International patient enquiry CRM:** lead records, source tracking, status and follow-up workflows.
- **Video consultations:** integration with suitable platforms where legally permitted and clinically appropriate.

## A CONNECTED INTERNATIONAL ENQUIRY FLOW

| 1. REACH | 2. INFORM | 3. CAPTURE | 4. COORDINATE |
|---|---|---|---|
| Market-specific campaign | Localised landing page | Secure enquiry pathway | Provider team / CRM |

Cross-border healthcare promotion, patient referral, telemedicine, privacy and data transfers are subject to local laws and professional rules in both origin and destination markets. Each proposed market and workflow should be reviewed before launch.

# Create once. Adapt for more audiences.

Use a consistent content engine to help healthcare organisations communicate clearly across platforms and languages.

## CONTENT & CAMPAIGN CAPABILITIES

- Content strategy, editorial calendars and campaign planning.
- Doctor introduction videos, educational explainers and clinic overview films.
- Short-form video assets for Instagram Reels, YouTube Shorts and other suitable channels.
- AI-assisted editing, voice localisation, dubbing and lip-sync workflows.
- Multilingual captions, subtitles and adapted campaign creative.
- SEO content planning, on-page optimisation and technical website recommendations.
- Social media publishing support and paid campaign management.
- Lead capture, campaign tagging, analytics and performance reporting.

## A PRACTICAL CONTENT WORKFLOW

### PLAN

Define audience, goals, approved topics and target markets.

### CREATE

Produce the source video, article or campaign asset.

### LOCALISE

Adapt language, captions and creative for each audience.

### PUBLISH

Deploy through the selected website and social channels.

### MEASURE

Review reach, engagement, website actions and enquiries.

# Built around your workflows

QC can connect the public-facing website with the systems and processes that help the organisation manage content, enquiries and digital operations.

## POTENTIAL PLATFORM COMPONENTS

- Custom websites and content management systems.
- Appointment, contact and enquiry forms.
- CRM, email marketing and messaging integrations.
- Payment gateways and e-commerce integrations.
- LMS, membership and subscription systems.
- Analytics, conversion tracking and reporting.
- Distributor portals and partner resource libraries.
- Role-based access, secure hosting options, backups and maintenance planning.

## PRIVACY, SECURITY & HEALTHCARE COMPLIANCE

Healthcare data requires particular care. The platform scope should minimise collection of sensitive patient information and use appropriate security controls, access permissions, retention practices and vendor assessments. Applicable requirements may include Malaysia's PDPA, India's DPDP Act, the EU GDPR, HIPAA where applicable, and relevant medical advertising, telemedicine and professional regulations.

QC can design and implement agreed technical workflows, but does not provide legal, regulatory, clinical or cybersecurity certification. The healthcare organisation remains responsible for compliance decisions, clinical accuracy, patient consent and approval of published claims. A qualified adviser should review the solution for each operating market.

# Start with a focused project. Build towards growth.

Engagements can be scoped as a one-time build, a campaign, or an ongoing digital partnership.

| | |
|---|---|
| **DISCOVER** | Understand the organisation, audience, services, markets and business objectives. |
| **STRATEGISE** | Agree priorities, deliverables, platform requirements, content plan and success measures. |
| **BUILD** | Design and develop the website, CMS, integrations and creative assets. |
| **LAUNCH** | Test, review, obtain client approvals and publish the agreed digital experience. |
| **OPTIMISE** | Monitor agreed metrics, improve content and refine campaigns over time. |

## POSSIBLE ENGAGEMENT OPTIONS

- **Digital foundation:** website, professional profile, CMS and essential enquiry pathways.
- **Growth campaign:** content production, SEO foundations, social media and paid campaign support.
- **Platform development:** LMS, subscription portal, e-commerce, CRM or international patient enquiry system.
- **Ongoing partnership:** monthly content, marketing operations, analytics, optimisation and technical support.

# Your next step starts with a conversation

Every healthcare organisation has different audiences, services, workflows and regulatory considerations. QC begins by understanding your goals and then shaping a practical digital roadmap.

## A DISCOVERY CONVERSATION CAN COVER

- Your speciality, organisation or healthcare product.
- The audiences and countries you want to reach.
- Your current website, social channels and digital systems.
- Whether your priority is professional branding, patient enquiries, product sales, education or international growth.
- The right first project, timeline and measurable objectives.

**QUANTUM CLIMB**

AI-powered digital products, media and experiences.

**HEALTHCARE DIGITAL GROWTH**

Build Once. Access Anywhere.

Contact details can be added before external distribution: website • email • phone • business address

This catalogue describes potential services and capabilities. Final scope, timelines, fees, third-party costs, integrations and market availability are confirmed through a project proposal. No patient, sales, ranking or clinical outcome is guaranteed.
